

Sosena Gossaye

Fullstack Developer and Junior AI Developer

✉ sosenagossaye2021@gmail.com 📞 251908346732 📍 Addis Ababa, Ethiopia  Sosena Gossaye  sosena2

PROFILE

Final-year Software Engineering student at **AASTU** with experience spanning full-stack engineering and AI/ML. I've built real-world full-stack applications alongside AI/ML projects.

EDUCATION

BSC in Software Engineering

Addis Ababa Science and Technology University 

02/2023 – 06/2027
Addis Ababa, Ethiopia

- **Relevant Coursework:** Internet Programming, Database Systems, Object-Oriented Programming, Operating Systems, Data Structures, and Algorithms.

Kifiya AI Mastry (KAIM)

10 Academy 

03/2026 – 08/2026
Remote

- A 3-month, project-based training, covering Machine Learning Engineering, Data Engineering, and Financial Analysis.

Competitive Programming and Coding Academy

Africa to silicon Valley 

02/2025 – 10/2025
Addis Ababa, Ethiopia

- Engaged in a rigorous 30+ hours/week curriculum in advanced Data Structures and Algorithms, solving 650+ problems on Codeforces  and LeetCode .

PROFESSIONAL EXPERIENCE

Full Stack Development Intern

HPC & Big Data Analytics Center of Excellence, AASTU

06/2026 – Present
Addis Ababa, Ethiopia

- Full-stack development on the Open Research Data Portal (ORDP): built core pages (dataset browsing, detail views, Researcher Dashboard) using React, Vite, and Tailwind CSS, backed by a Django API
- Resolved backend issues including file validation, MinIO storage, and Django migration conflicts

AGI intern

Icog Labs 

07/2026 – Present
Addis Ababa, Ethiopia

- Contributing to SubRep, a multi-objective reinforcement learning project within the OpenCog/SingularityNET ecosystem, aimed at AGI research
- Generalized the Motive Decomposition Network (MDN) to support N objectives, resolving parametrization and checkpoint-compatibility issues

PROJECTS

RAG Complaint Chatbot

KAIM project

- Built a retrieval-augmented chatbot using semantic search, embeddings, and ChromaDB to provide source-grounded responses to customer complaints.
- Implemented document chunking, metadata filtering, response evaluation, streaming, automated tests, and CI.

Pharma-flow

GDG hackathon project

- Built backend services for a medicine locator application using Node.js and Express, enabling users to scan prescriptions and find nearby pharmacies with medicine availability and map-based navigation.
- Developed optimized RESTful APIs for medicine search, pharmacy lookup, geospatial search, distance calculation, and availability matching to improve performance and user experience.

Ethio Guide

Internship project

- Contributed to frontend development using Next.js, implementing responsive UI components.
- Collaborated with backend team for seamless API integration
- Improved user navigation and responsive layout across different screen sizes.

SKILLS

Languages

HTML5, CSS3, JavaScript (ES6+), TypeScript, Java, python, C++

Frontend Frameworks & Libraries:

React.js, Next.js, Redux, Tailwind CSS

Backend Frameworks & Databases:

Node.js, Express.js, MongoDB, Postgres, MySQL, Django, FastApi

AI/ML

Machine Learning, Deep Learning, Reinforcement Learning, TensorFlow, Scikit-learn, Pandas, NumPy, MLflow, Prompt Engineering, RAG, LLM Fine-tuning

Tools & Platforms

Git, GitHub, VS Code, Netlify, Vercel
